Wright's Meadows, or the Maples, is an interesting large farmhouse which has grown and been remodeled as the family needs changed.

It is a 'T' plan building with a small extension and porch on the east side. The north portion of the house is five bays long, two-thirds of which is brick. About in the center of the north facade is the entrance with sidelights and a small porch made over from the larger porch which extended across the facade in the late 19th century until recently. East of the door is one window with 9/6 sash and west of the door are two similar windows. The five windows of the second story have 6/6 sash. In each gable are brick chimneys. To the rear of the building is an extension nearly as long as the front portion of the house.

The floor plan consists of a central stair hall flanked by a single room on each side. Behind the hall and living room is a large dining room and a large kitchen. Off the dining room is the farm office, and off the kitchen is a

porch on each side.

Originally, the brick part appears to have been a typical "hall and parlor" dwelling of the first quarter of the 19th century which was remodeled in the third quarter of the 19th century, similar to Inspection Farm near Hurlock. Little of the original fabric remains except the stuccoed brick walls and a couple of doors.

Pre-Columbian   16th Century   18th Century   19th Century   19t	Planning (Specify)  Description  Contact the Edward of E
